

Includes Hot and Cold Wraps:

**Back and Body:
Supports & Heat/Ice
Wraps**

Comfortable lumbar supports can protect your back from injury, especially during slips, trips or falls.

Studies have shown that during such events, back muscles can over-contract by as much as 70%.

With its unique internal pressure pads over the hips, the Body Glove ACCUPRESSURE reduces this excess exertion by up to 46%.

The Open Road, constructed of our exclusive Tradewinds breathable neoprene fabric, provides the fit and comfort of traditional neoprene minus the heat.

Make recovery easier with Body Glove Wraps for arms, legs, back and shoulders. Constructed of heat and cold retaining neoprene, durable and washable, these wraps are designed to move with you.

Drill-Down Info:

Accupressure Back Support

The Iowa Spine Research Center at The University of Iowa and Chase Ergonomics have incorporated new knowledge of how the body reacts to sudden loading into the design of the Accupressure back support.

During sudden, unexpected loading of the spine, back muscles can over-contract by as much as 70%. This over-contraction is often the hazard that triggers back injury.

Accupressure reduces this excess exertion by up to 46%. In addition, the Iowa studies document less fatigue in subjects wearing the Accupressure.

- Constructed of Tradewinds®, our exclusive breathable neoprene, for cool comfort under clothing or in hot or humid weather.
- Internal, integral pressure pads over the hips reduce the effect of accidents.
- Triple Lock cinch strap feature keeps belt secure.
- Number of spring steel orthopedic boning stays increases as belt size increases.

Sizing for Accupressure, measure around hips just below navel:

XS: 23-27"; S: 28-32"; M: 33-37"; L: 38-44"; XL: 45-51"; XXL: 52-56"

Drill-Down Info:

Open Road Back Support

Provides lower back support even in the driver's seat. High-rise front panels allow for strong support when working, and comfort while seated. Five inch cinch straps adjust to give desired level of compression.

Comfortable high-rise front panel "cutaway" design is comfortable when sitting or bending.

Constructed of Body Glove's exclusive Tradewinds® 100% open-cell breathable neoprene.

Tradewinds holds its shape and offers a smooth, non-irritating surface, comfortable in hot or humid weather or under clothing.

Open cells will not close up when bunched or, most importantly, when stretched.

- Four sewn-in boning stays
- 1 1/4" wide elastic shoulder straps.
- Breathable Lycra® spandex and knit elastic construction.
- Length and tension of shoulder straps adjustable via front bar slides or hook-and-loop at both front and back of support.

Sizing for Open Road, measure around hips just below navel:

S: 28-32"; M: 33-38"; L: 39-44"; XL: 45-49"; XXL: 50-54"
