

Affordable, Stylish, Compliant
V-Line Plano Series

8-base curve single lens design offers affordable, stylish clarity with minimal distortion. Eyewear meets ANSI Z87.1+ (high-impact) standard.

Patented foam rubber pads at the temples and frame interior enhance side-shield protection and fit. Desert camouflage, black and white, or coordinated tan or gray neoprene insets run along the temples and allow glasses to float, just like traditional Body Glove surfer's specs.

Tough polycarbonate lenses protect the eyes from debris injuries and provide 99% protection from UVA and UVB radiation.

Glasses come with soft drawstring case and cord retainer with quick-release safety clips. A replacement black neoprene keeper strap with the Body Glove logo is also available.

- ANSI Z87.1+ (high-impact)
- 99% UVA and UVB protection
- H2 scratch-resistant coating provides long life.
- Yellow lenses increase contrast and depth perception, and are ideal for lower light conditions
- Shatterproof polycarbonate
- Affordably priced

Dual Lens Construction:

V-Line Plus

Molded polycarbonate dual lenses with 8-base curve wraparound. Lenses are protected with an H2 scratch-resistant coating.

ANSI Z87.1+ high-impact standard compliant.

Available in 8 lens and frame color combinations including Clear, Brown or Gray lenses in Clear, Gloss black or tan/gray/black Camo frames.

Brown and Gray lenses are safe for stop-and-go driving, and meet traffic signal-safe color recognition compliance (ANSI Z80.3-2001).

Patented foam pads at temples and frame interior enhance fit and provide increased protection below and at the sides of lenses. Foam-padded sidearms ensure flotation for a "never lost" benefit.

Glasses are packaged in a soft carrying case.

- Shatterproof polycarbonate
- ANSI Z87.1+ high impact
- 99% UVA & UVB protection
- Clear plus 2 color-neutral, traffic-signal safe lens options
- Ideal for anyone working on or near water

Specialty Lenses:

Polarized & Infrared

- ANSI Z87.1+ high impact
- Tough polycarbonate construction
- 99.9% protection from UVA and UVB radiation
- H2 scratch-resistance coating.
- Patented foam rubber pads at the temples and frame interior enhance side-shield protection and fit
- Glasses come with soft drawstring case and cord retainer with quick-release safety clips

Polarized

Body Glove's polarized safety glasses absorb glare created by horizontal lightwaves bouncing off water, sand, snow and glass or metal surfaces. Reduced glare eases eyestrain and muscle fatigue caused by constant squinting.

Infrared

Traffic-Signal Safe Infrared: Protection from transient IR and everyday sun exposure, making them ideal for work and after-work wear.

Lenses reduce infrared-caused heat, dryness and resulting eye fatigue without color distortion. Safe for stop-and-go driving.

Shade 3 visible, shade 1.7 infrared.
