

**Gloves and GripStrip Handle Wrap:
Hand Protection**

Body Glove Safety's™ 100% open-cell breathable Tradewinds™ fabric fits and compresses like traditional neoprene without the usual heat or moisture buildup.

Tradewinds smooth surface is comfortable under clothing or in hot, humid weather, and puts an end to the rashes, sweating, itching and discomfort caused by fabrics that trap body heat.

Two glove styles, one heavy duty and one for lighter tasks, provide a comfortable, ergonomic fit and the benefits of Tradewinds fabric. Interior pads of GPact™ damp shock and impact reaching hands and arms during non-powered tool use.

Independently tested GripStrip Tool Handle Wrap offers the same defense against shock in a convenient, easy to apply wrap. Make any tool more ergonomically sound in a matter of minutes!

GLOVE SIZING: Measure around hand at widest point of palm.

XS: (Not available for Heavy Duty Glove) 6.5"-7"; S: 7.5"-8"; M: 8.5"-9"; L: 9.5"-10"; XL: 10.5"-11"; XXL: 11.5"-12"

Knuckle, palm, wrist, hand protection:

Mechanics Heavy Duty Glove

Body Glove® Heavy Duty gloves feature a hard shell polymer knuckle cage and protective knuckle caps to shield the vulnerable top of hand from bangs, bumps, scrapes and cuts.

High-visibility glove body of Tradewinds® 100% open-cell breathable neoprene.

As sturdy and snug-fitting as closed-cell (wetsuit) neoprene, Tradewinds holds its shape and offers a smooth, non-irritating surface, comfortable in hot or humid weather or under clothing.

Open cells will not close up when bunched or, most importantly, when stretched.

- Gpact™ proven shock absorbing pads protect the palm and thumb span from impact and contact stress.
- Palm pads are covered with cut-resistant fabric containing Kevlar®.
- Extra long elasticized cuff insert keeps debris out.

High Dexterity and Tactile Sensitivity:

**Mechanics Glove:
Full Finger**

Body Glove Mechanic Style work gloves are ergonomically designed to provide a safe, secure grip and reduce hand fatigue. Curved sidewalls and inset thumb tailoring mimic the natural anatomy of the hand, and allow hands to maintain their most comfortable positions while at work or at rest.

Ergonomically engineered design minimizes blousing at palm and over thumb saddle when gripping tools.

- Four-point fingertip construction reduces fabric bulk and wear on glove while maintaining dexterity.
- Reinforced knuckle protection.
- Extended streamline smooth cuff reduces risk of snagging or catching on workplace hazards.
- Palm heel protects hand and arm with a shock and impact damping Gpact™ pad covered in durable Kevlar®.
- Tradewinds® breathable neoprene fabric forms topside of the glove, for cooler comfort in warm working conditions.
- Top of glove features a catch pocket to hold small items.

High Dexterity, Bare Fingertips:

**Mechanics Glove:
Half Finger**

Body Glove Safety™ Mechanic Style work gloves are ergonomically designed to provide a safe, secure grip and reduce hand fatigue.

Curved sidewalls and inset thumb tailoring mimic the natural anatomy of the hand, and allow hands to maintain their most comfortable positions while at work or at rest.

Ergonomically engineered design minimizes blousing at palm and over thumb saddle when gripping tools.

- Half-finger style maintains complete dexterity.
- Extended streamline smooth cuff reduces risk of snagging or catching on workplace hazards.
- Palm heel protects hand and arm from force generated by pneumatic tools with a shock and impact damping Gpact™ pad covered in durable Kevlar®.
- Body Glove's exclusive Tradewinds® breathable neoprene fabric forms the topside of the glove, offering cooler comfort in warm working conditions.
- Top of glove features a catch pocket to hold small items.

TRADEWINDS®

Passive, easy to apply protection:

GripStrip Handle Wrap

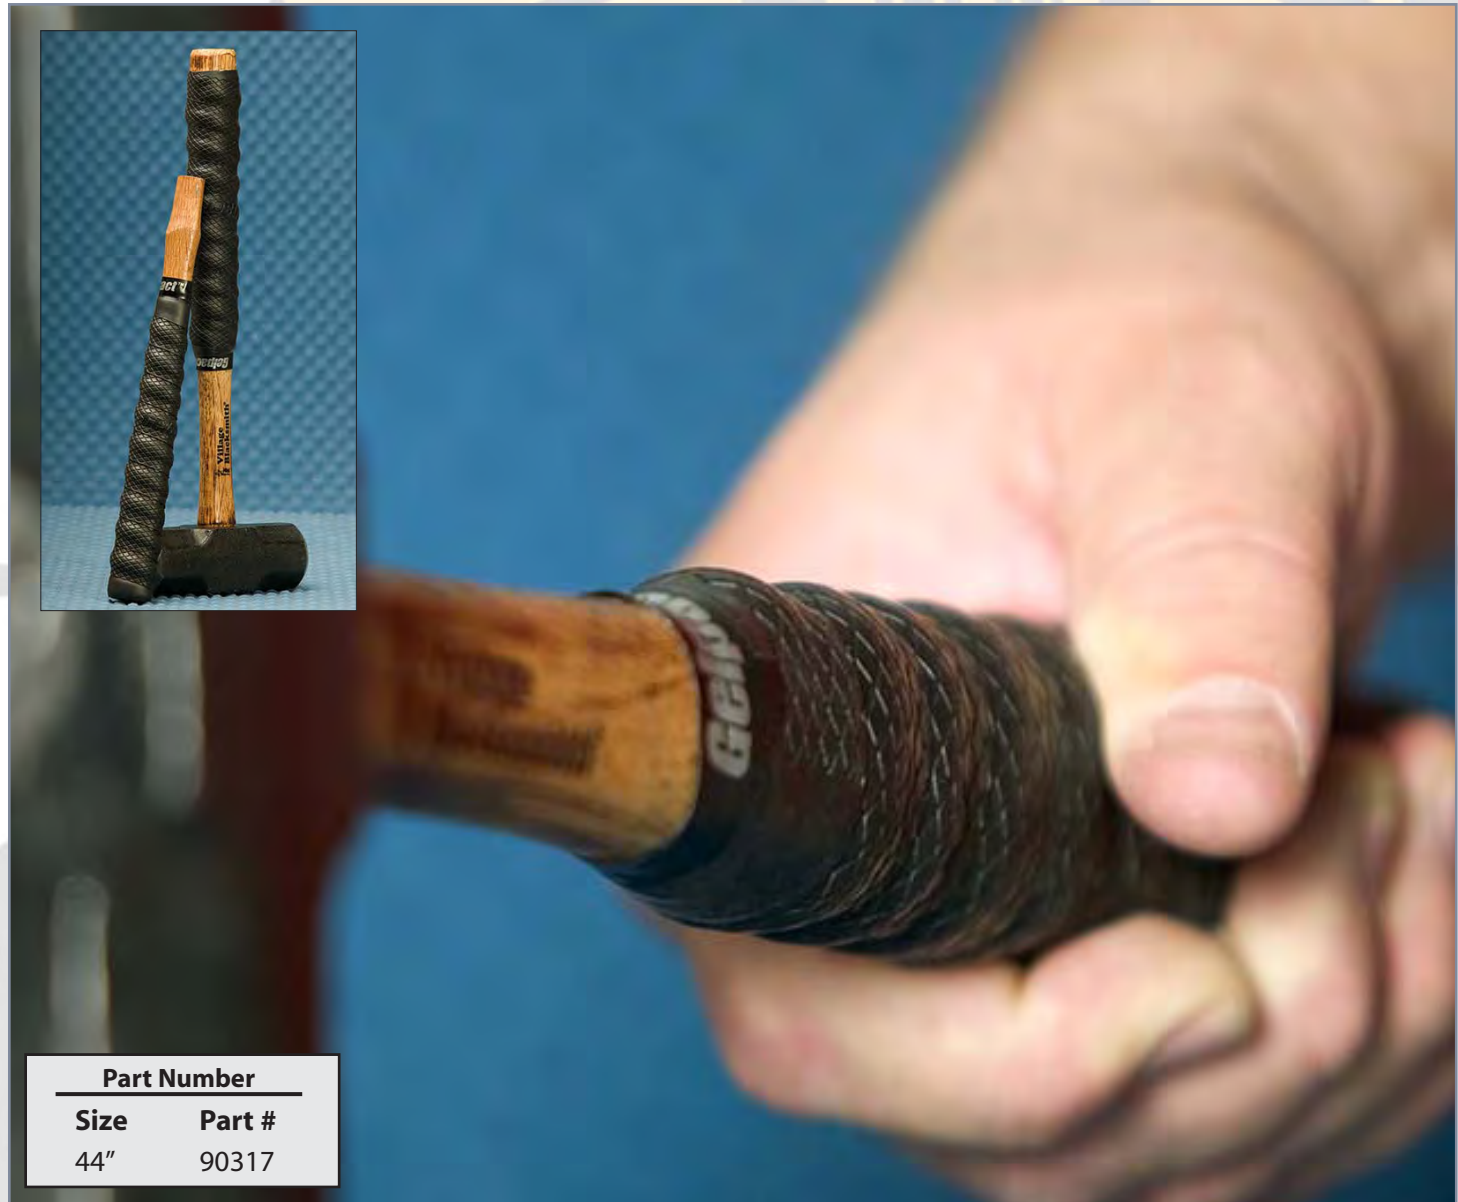

GripStrip Tool handle wrap creates passive damping of shock/impact forces, and eases exposure to contact stress.

For tool handles, railings, levers or other gripping surfaces, especially those requiring frequent or continual tight grip.

15/16" width patterned urethane surface offers sure grip and great flexibility.

Bonded Gpact™ gel material strip reduces impact forces reaching the hand, offers moderate shock/impact protection and insulation from tool heat or chill.

- Wraps like a bicycle handlebar wrap.
- Independent laboratory testing verifies the superior performance of Gpact™, our proven, patented, shock/impact damping material.
- Finishing tape is included. Finish multiple small wraps with duct or other highly adhesive tape.
- 44" length single-use pack wraps a normal size hammer handle.
- Not for use on painted surfaces.
