

Defend Against Hard Surface Contact:

**Shock Impact & Contact Stress Protection**

Shock/impact forces generated while using high-impact tools, using hands to strike objects, or using poorly designed tool handles can lead to muscle, bone or soft tissue discomfort and injury.

Kneeling on, pushing against, sitting on, or merely contacting hard or sharp surfaces can result in contact stress aches and soreness.

Our specialized stress and shock impact products, many constructed with Gpact™ force-dampening gel material, can effectively cut the risk of shock and impact injury.

An innovation in shock/impact protection, Gpact™ dramatically reduces impact forces reaching the hands. Independent lab testing by Ingemansson Technology AB – Europe's leading consultants in acoustics, noise and vibration – verifies the superior performance of this versatile material.

**GLOVE SIZING:** Measure around hand at widest point of palm.

S: 7.5"-8"; M: 8.5"-9"; L: 9.5"-10";  
XL: 10.5"-11"; XXL: 11.5"-12"  
(Ultralights only).

**For the toughest environments:**  
**Super Duty Knee Pads**

Our toughest knee protectors:  
Perfect for applications in mines,  
quarries, construction sites,  
demolition, concrete, rock, metal and  
rough or pebbled surfaces.

- Designed for heavy duty use on extreme surfaces.
- High impact outside rubber shell for maximum knee protection and flexibility.
- Non-skid textured outside surface for safety on slick or uneven surfaces.
- Comfortable, flexible 1/2" foamed rubber inside padding provides soft cushioning for the knees and dampens impacts.
- Ideal for welders: surface grip and protection against ragged metal edges.
- Sturdy dual 5/8" leather straps secure each knee pad.
- One size fits all.
- Sold in pairs.

Internal pads for added comfort:

**Contour**

Soft, conforming interior material shield the knees from hard and uneven surface contact. A flat kneeling surface ensures stability, while gripper bumps reduce the risk of slipping or sliding. Configurable strapping system allows wearer to criss-cross straps or wrap above and below the knee, for a secure fit over bare legs or heavy trousers.

- On-off clips located at the sides of the knee pad end constant/daily adjustment of straps - just size once and clip. Pads stay snug over pants or against bare legs.
- Heavy duty polymer construction.
- One size fits all.
- Outer shell withstands temperatures up to 250 degrees Fahrenheit.
- Sold in pairs.

Lightweight protection from Stress:  
**Ultralight Mechanic's**

Lightweight Lycra® spandex and clarino construction in a full-finger style.

Patented Gpact™ pads provide protection from shock/impact, contact stress and sharp edges or points.

Adjustable hook and loop closure at wrist keeps debris out of glove. Terry insert in thumb and forefinger.

Ribbed Spandex back allows full hand flexibility and helps keep hands cooler in warm environments.

• Independent laboratory testing verifies the superior performance of Gpact™, our proven, patented, shock/impact damping material.

• Full-finger offers Gpact™ palm protection plus coverage for fingertips and fingernails.

• Pad placement and strategic stitching across palm reduces bulk and hand fatigue.

• Sold as pairs.

Hot weather impact protection:

**Ultralight  
Material Handler's**

Lightweight Lycra® spandex and clarino construction in a half-finger style.

Patented Gpact™ pads provide protection from shock/impact, contact stress and sharp edges or points.

Adjustable hook and loop closure at wrist keeps debris out of glove.

Terry insert in thumb and forefinger absorbs perspiration.

Ribbed Spandex back allows full hand flexibility and helps keep hands cooler in warm environments.

- Independent laboratory testing verifies the superior performance of Gpact™, our proven, patented, shock/impact damping material.
- Complete dexterity plus palm protection.
- The ideal light duty glove for hot and humid environments.
- Sold as pairs.

**Damps Shock Impact/Contact Stress:**  
**FIT Impact Glove**

Glove protects from contact stress and resonance associated with use of slow-stroking power tools and non-powered striking tools.

Molded "Memory Foam" panels across palm and heel of hand encircle tool handles and shield hand from impact, but don't interfere with grip or dexterity.

- Anatomically correct English-cut inset thumb.
- Finger fourchettes eliminate twisted fingers.
- Precurved sidewalls mimic natural curve of hand.
- Top of hand dip coated for long life. Tough, non-slip palm repels oil.
- Reinforced fingernail guards increase glove life and protect fingertips.
- Comfortable, ergonomically correct grip. Minimal fabric blousing across base of fingers and thumb saddle.
- Self-fastening double-knit wrist band with gusset keeps debris out.
- Will not shrink, stretch or harden.
- Machine wash warm, tumble dry low heat.

Passive, easy to apply protection:

## GripStrip

Decade's exclusive GripStrip Tool handle wrap creates passive damping of shock/impact forces, and eases exposure to contact stress.

For tool handles, railings, levers or other gripping surfaces, especially those requiring frequent or continual tight grip.

15/16" width patterned urethane surface offers sure grip and great flexibility.

Bonded Gpact™ gel material strip reduces impact forces reaching the hand, offers moderate shock/impact protection and insulation from tool heat or chill.

- Wraps like a bicycle handlebar wrap.
- Independent laboratory testing verifies the superior performance of Gpact™, our proven, patented, shock/impact damping material.
- Finishing tape is included in the single-use pack. Finish multiple wraps with duct or other highly adhesive tape.
- Available in 44" length single-use packs (43236), which wrap a normal size hammer handle.
- Shop-use bulk rolls (43425), will wrap approximately 5-6 average tool handles.
- Not for use on painted surfaces.

**Favorite of Truck & Forklift Drivers:  
GSPad**

Provides enhanced protection from vibration and shock associated with operating both heavy and light equipment.

Constructed of a durable canvas laminate cover and a 3/4" thick pad of firm Gfôm® anti-vibration gel material.

Comfort and safety for drivers ranging forklift operators to long-distance truckers.

- Easy to move from station to station, and this heavy cushion will not shift or bunch.
- Vibration reducing Gfôm® has been tested and certified in Europe to meet strict standards set there for worker protection.
- Testing was conducted at Delta Acoustics & Vibration in Denmark. Certification: CD DK-0200-C352.
- Easy to clean: simply wipe with a damp cloth.
- Sewn-on backties keep pad in place.
- Gfôm® and canvas construction make this pad flexible enough to fit a variety of seat contours.
