Active Gear: Gloves

Street Classic

Street Classics adapt the proven ergonomic design of Decade's popular Street Ride Gloves to a comfortable, fingerless summer style.

Constructed of full-grain, top quality leather, the Classic features an inset, Bolton-cut thumb, long-lasting double stitching at wear points, and comfortable padding across the palm and base of the fingers. Pads are securely stitched at strategic points to reduce bulk and allow the hand to curve comfortably around tool handles and handlebars.

Embossed leather wrist strap fastens with hook-and-loop to keep dirt and debris out, while keeping the glove in place.

A comfortable warm-weather alternative to full-fingered biker's gloves, Street Classics provide a more secure grip, plus shock and impact protection from prolonged contact stress.

2 sizes: M/L and L/XL fit a wide range of hands.

Active Gear: Gloves

Street Ride

Made of full-grain, top quality leather, the Ride takes a traditional rider's glove to a new level with the added benefits of safe and comfortable ergonomic design. Leather sidewalls and fourchettes between the fingers create a "3-D" glove designed to fit comfortably on hands gripping tools, equipment or handlebars. Pre-curved shaping and an inset, Bolton-cut thumb accommodate the hand without bunching, blousing or binding across the palm or thumb saddle.

Shirred elastic gathers at wrist keep dirt and debris out, and allow for fast donning and removal. The adjustable wrist strap secures glove in place, comfortably, all day. Extra long cuff covers the wrist and arm to the cuff of a long-sleeved shirt or jacket.

Exclusive Gpact™ palm pad hinged where the fingers meet the hand provides shock and impact protection where it's needed.

2 sizes: M/L and L/XL fit a wide range of hands.

Brands: Decade[®] Decade Sport[™] Body Glove[®] Chase[™] Decade Bio[™]

Active Gear: Gloves
Street Cruiser

Ultimate comfort, rugged durability and extra protection in a classic goatskin rider's glove. Ergonomically tailored for comfortable fit over extended rides.

High-impact polymer knuckle cage and interior protective caps over first finger joints. Embedded GPact[™] gel pads relieve contact stress where the fingers meet the palm and the hand meets the handlebars.

Secure wrist tab closure strategically positioned opposite the thumb keeps out wind. Longer length cuff covers arm up to long-sleeved shirt or jacket.

Ergonomic construction mimics the natural shape of the hand when gripping handlebars. Four-point fingertip construction eliminates excess fabric bulk in fingertips, for a smooth, non-irritating fit all day long.

2 sizes: M/L and L/XXL fit a wide range of hands.

Active Gear

Tool and Gear Bag

Keeping specialized gear at hand on a daily basis or when on road trips is made easy and convenient with this durable gear bag. Its tough leather shell provides protection from the elements while the HD foam lining offers a cushioned surface on the interior.

Leather main straps wrap completely around the bag for secure closing. Dual attachment straps in back are long enough to attach the bag to a variety of bars, on tool carts, truck racks or motorcycles.

Plated brass buckles with rollers make for easy strapping down. Riveted contact points give extra strength and provide lasting durability in this addition to traditional, rugged motorcycle accessories.

Active Gear: Gloves

OffRoad

Fine-tailored, ergonomic design features an inset Bolton thumb and pre-curved fingers, creating a glove that works with the hand in a natural gripping position, and results in reduced hand fatigue, increased dexterity and longer glove life. Exclusive GPact™ gel pads over the palm cut impact, pressure, and shock to the hand and the sensitive area at the base of the fingers.

Strategically-placed carbon-fiber knuckle caps and finger joint pads protect the top of the hands from bumps and abrasions. Hook-and-loop wrist closure opens and closes easily for quick adjustment, keeps dirt and debris out of the glove and ends "ride-up" by keeping the glove securely positioned on the hand.

Tailored to provide a comfortable fit when gripping tools, equipment handles or handlebars, the Offroad provides ample room at the fingertips. Furchette fabric panels between the fingers prevent the twisting and pressure on the fingertips caused by flat-fingered gloves.

2 sizes: M/L and L/XL fit a wide range of hands.

Active Gear: Gloves

Street

Full grain goatskin leather over a spandex body for mobility, comfort and durability. Double-stitched leather runs from below the knuckles all the way up the fingers, covering an embedded, high-impact polymer knuckle cage and knuckle caps at each knuckle, providing full armor for ultimate protection.

Knuckle cage is constructed to ride with the motion of the hand and “tip when you grip.” Embedded GPact™ gel pads relieve stress and absorb shock and impact where the fingers meet the hand and protects from “finger tingle.” Leather ulna pad protects the wrist bone.

Ergonomically constructed inset thumb and pre-curve mimic the natural shape of the hand when gripping tool handles, equipment or handlebars. No fabric bulk in fingertips.

2 sizes: M/L and L/XL fit a wide range of hands.
