BRIEF

Unisize Tennis Elbow Support

TRADEWINDS®

100% open cell neoprene

Part No. 90160

Fits right or left

Unisize

Color: Black

Hand wash cool, dry flat

Tennis elbow support provides adjustable, controlled compression and reduces tendency to overgrip, while still allowing use of elbow. Encourages healing and eases pain associated with sprains, tendonitis, arthritis and “tennis elbow”. Designed to put on and take off quickly and easily, with one hand. One size fits all makes quick work of stocking, inventory, and reordering.

Support is constructed of Body Glove Safety’s exclusive Tradewinds® 100% open-cell breathable neoprene. As sturdy and snug-fitting as closed-cell (wetsuit) neoprene, Tradewinds holds its shape and offers a smooth, non-irritating surface, comfortable in hot or humid weather or under clothing. Open cells will not close up when bunched or, most importantly, when stretched.

Available individually or as part of Unisize Support Saving Assortment, Part No. 90104. Hand wash, dry flat. Ship weight: 1 lb, Case Quantity: 10.
